Congress School Partnerships for Student Achievement

CONGRESS VISION STATEMENT

Congress School's primary goal is to develop independent thinkers and life long learners in a safe and caring environment. We are committed to initiating and maintaining meaningful partnerships with families and the community. We function in an inclusive environment where children are looked at as individuals, where their special needs and talents are strengthened to support the development of life skills, morals, and values.

Quality teaching and high expectations, with the belief that every child will be successful, are the principles that drive our curriculum. Evidence-based practices along with rich language and creative experiences guide our successful curriculum implementation. Our entire school community supports each other to practice Communication, Collaboration, Consistency and Continuity.

We will develop students that are proficient or advanced in all academic areas through the use of differentiated instruction, extra-curricular activities, smaller class sizes in the foundation grades and a cultivation of personal talents. Learning at Congress is challenging, fun and exciting using innovative practices to engage students in meaningful ways. Our students will excel in each classroom and meet or exceed state and national standards throughout their educational journey here.

MISSION STATEMENT

Congress Year Round School is committed to creating a well-prepared and caring community of learners, where students work hard to be successful and the learning never stops.
